DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Harkness in view of Bursi. Harkness discloses a device support member worn around a person's body and an attached laser light(abstract) generating a linear alignment beam of light visible to the person to provide an alignment of the person's body when in position to perform the task as stated in claims 1 and 2 (figs. 2 and 3). Harkness also discloses a cylindrical lens and positions of the lens directing the beam of light as in claim 2 (fig 4 and col 3, lines 20-26). Harkness does not disclose a belt. However Bursi teaches a belt worn around a portion of a person (fig. 3). In view of such teachings it would have been obvious for anyone skilled in the art to modify the invention of Harkness with that of Bursi to provide a new look for the golfing aid.
